

## **FLORIDA PHYSICIANS SUPPORT AMENDMENT 4 TO STOP GOVERNMENT INTERFERENCE WITH ABORTION, ASK VOTERS TO VOTE YES ON 4**

We are a group of Florida physicians concerned about ongoing attacks on abortion access in Florida. Florida lawmakers have ignored not only the will of their constituents, but medical evidence, to ban abortion and restrict Floridians' reproductive freedom. They have inserted themselves into our exam rooms, our hospitals, and our relationships with our patients. They have put our patients' lives in danger.

Lawmakers have set a dangerous precedent of interference in reproductive health care. That is why we — Florida physicians — are proud to support Yes on 4, the campaign to protect Floridians' access to abortion and amend our state's constitution. The constitutional amendment, “Limiting Government Interference with Abortion,” is a critical initiative that would firmly establish protections against politicians interfering in Floridians' personal medical decisions. By supporting this amendment, health care providers are defending our patients' freedom to control their own bodies and our own ability to provide them the care that they seek.

As physicians, we have sworn an oath to do no harm and to provide effective, evidence-based, treatment to our patients. But since Florida's initial abortion ban took effect in July 2022, medical providers across the state have been forced to make decisions counter to that oath. We must choose between following an unyielding law and denying our patients essential medical care, or providing that care while risking loss of our licenses and even facing criminal charges.

We have also witnessed first-hand the psychological, physical, and emotional toll on patients. That toll has only worsened with the Florida Supreme Court upholding Florida's even more extreme, near-total abortion ban in April. In a state where maternal morbidity and mortality, especially for Black women, is already high, abortion bans put pregnant people at further risk of lifelong complications and even death.

Any infringement on access directly impacts the health and wellbeing of Floridians. Countless studies show that when people are denied abortion, they are more likely to be caught in cycles of poverty with their children; remain in abusive relationships; experience mental health conditions like depression and anxiety; and have poorer lifetime health outcomes.

Abortion is essential reproductive health care. It is past time for Florida to protect access to this care.

To all health care providers who believe in their patients' ability to control their bodies, and to all Floridians who want to keep the government out of their health care decisions: We urge you to vote yes on Amendment 4.

Floridians Protecting Freedom

Together, we can ensure that Floridians have the freedom and opportunities to control our lives at the most basic level: our bodies, our families, and our life's path - and that includes the ability to have an abortion.
